J.W. Ruby Memorial Stroke Center

2022

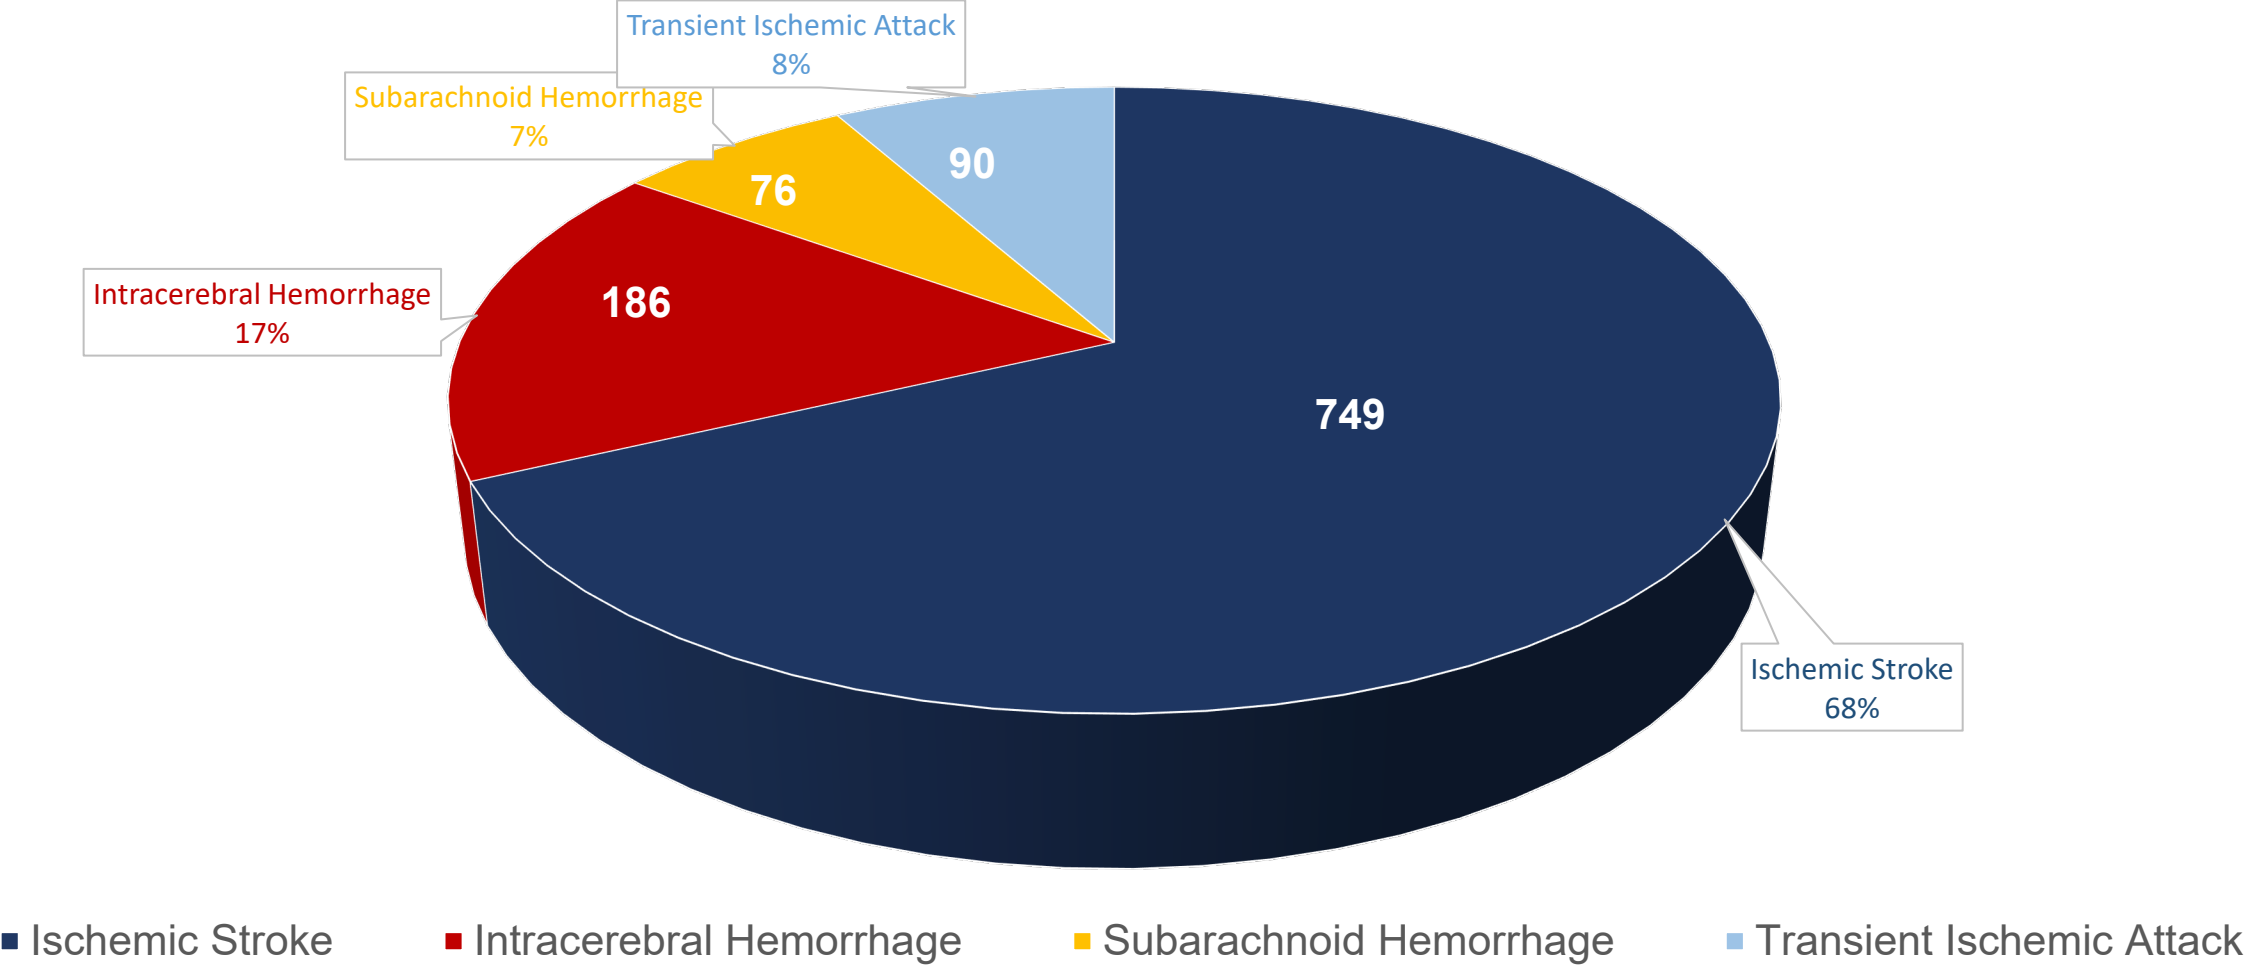

Annual Report
of Quality Performance

WVU Medicine's J. W. Ruby Memorial Hospital is a leader in stroke care and an award winning Joint Commission Certified Comprehensive Stroke Center. We offer advanced neurosciences treatments for all types of strokes, *all of the time*.

STROKE CENTER

J. W. Ruby Memorial Hospital treated *all types of strokes* in 2022

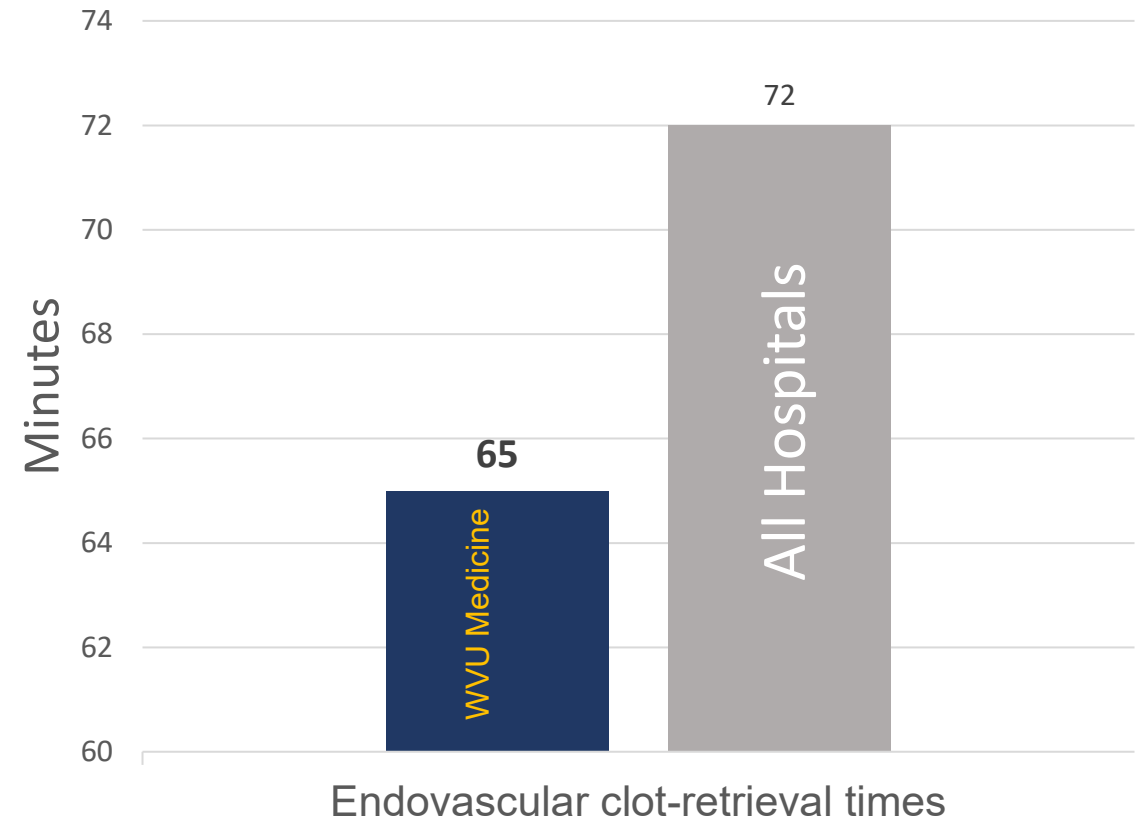

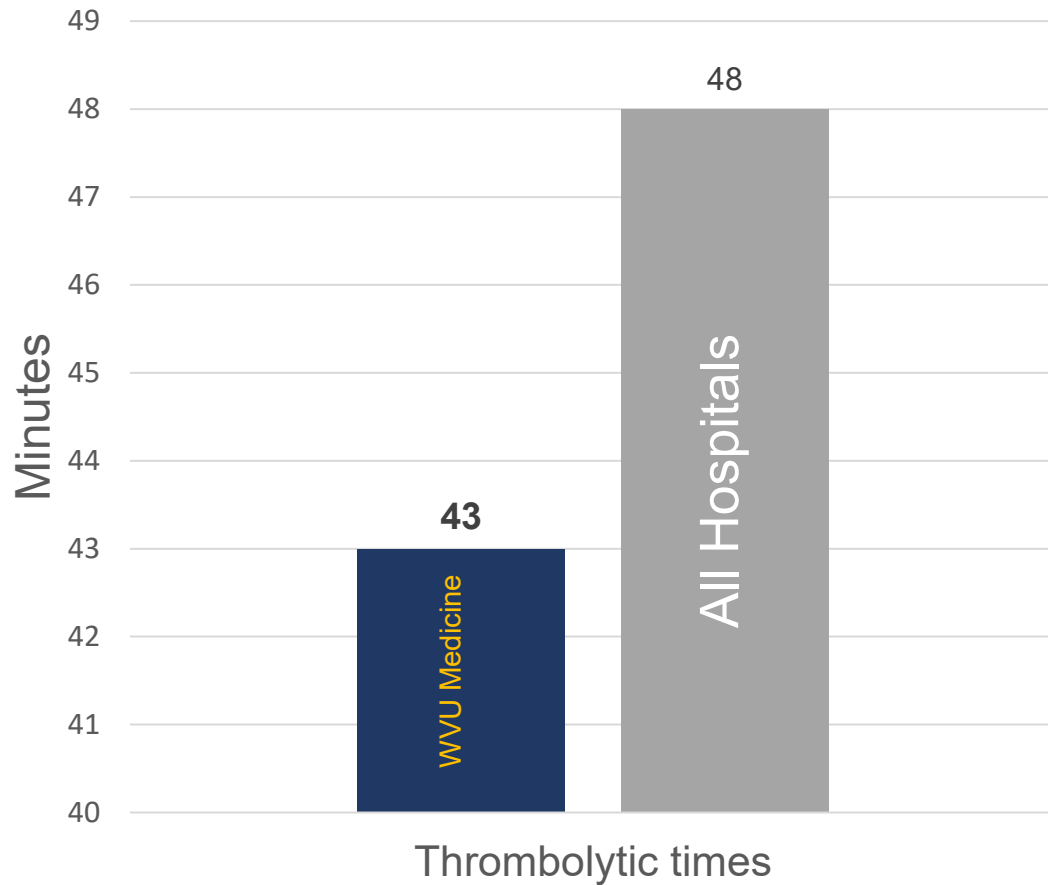

A Commitment to Providing the Best Stroke Care to Every Patient

- Thrombolytics are the FDA approved standard of care for patients suffering from acute ischemic stroke. Patients who meet criteria and are known to be less than 3 hours from onset of symptoms are eligible to receive this medication. We are committed to providing tPA to every patient who qualifies. *In 2022, we met that goal 100% of the time.*

***A select number of patients who meet additional, strict criteria may be eligible for tPA treatment up to 4 ½ hours from onset of symptoms.*

- Some large vessel occlusion (LVO) ischemic strokes may be treated with endovascular clot-retrieval by our interventional neuroradiology specialists. J. W. Ruby Memorial has provided this treatment *24/7 for more than 15 years.*
- We offer *24/7 neurosurgical coverage* for any stroke requiring surgical intervention.

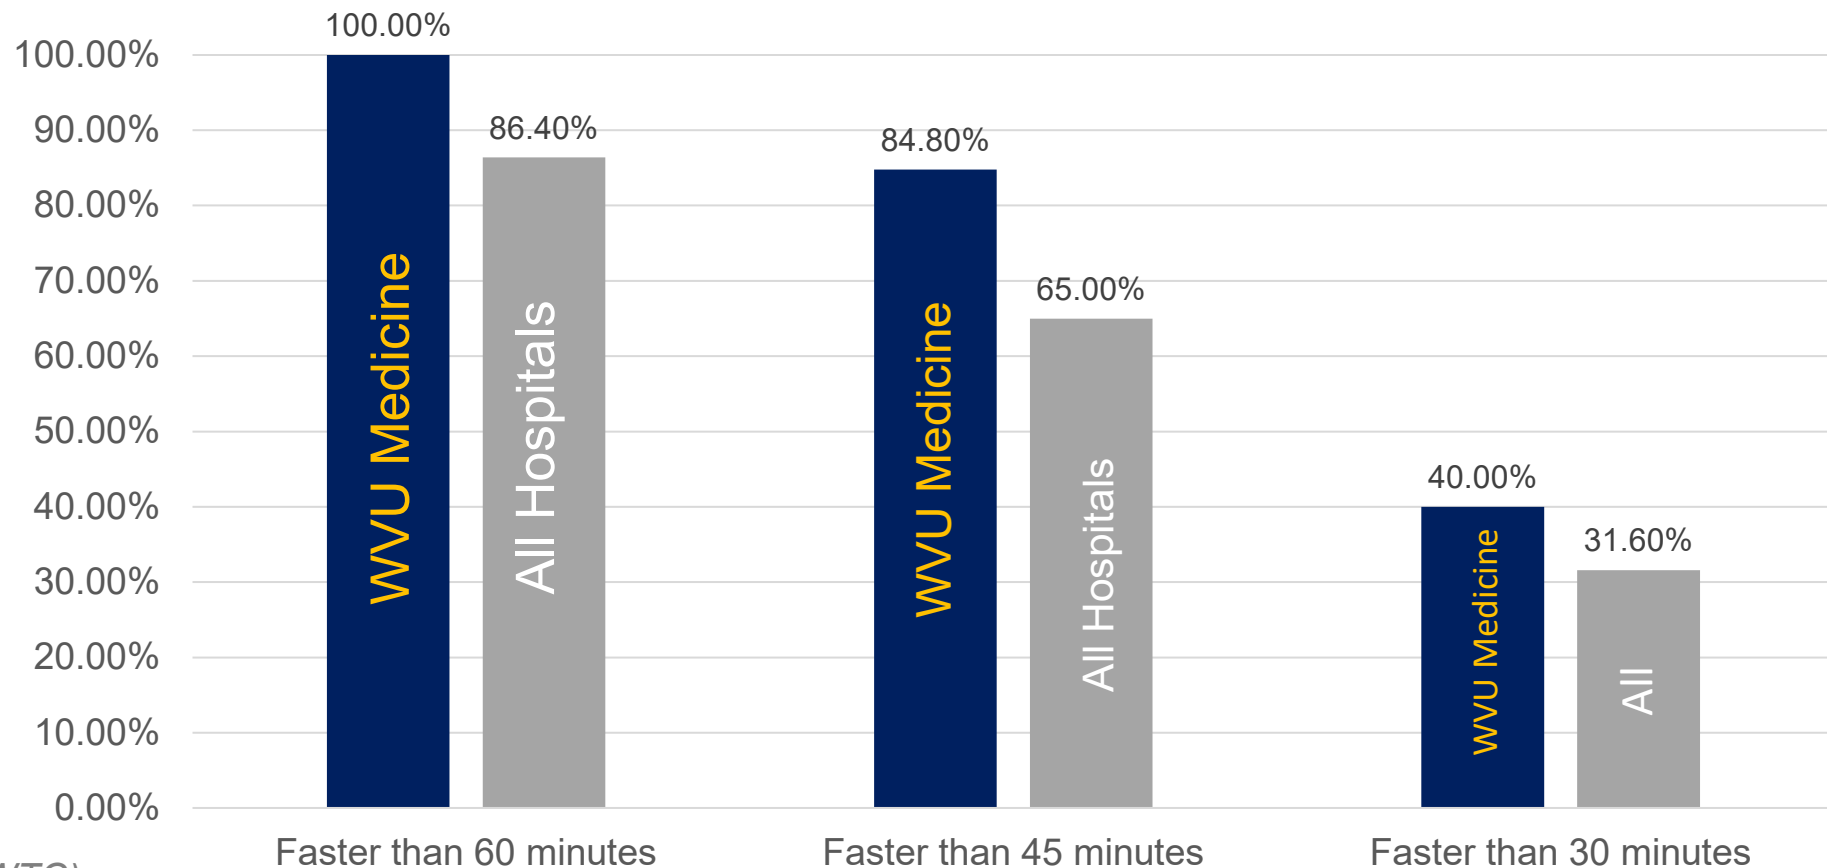

In 2022, J. W. Ruby Memorial Hospital was *faster at treating ischemic strokes* with thrombolytic and endovascular clot-retrieval than the national average.

(Source: GWTG)

In 2022, J. W. Ruby Memorial Hospital *treated a greater percentage of stroke patients faster than the 60 minutes, 45 minutes, and 30 minutes recommended treatment goals.* We were faster than the national average.

Higher percentage of thrombolytic faster than recommended goals

Our experts *worked together* to provide many additional cutting-edge stroke procedures in 2022.

J. W. Ruby Memorial Hospital consistently *meets or exceeds* the national average on Joint Commission Stroke Quality Measures.

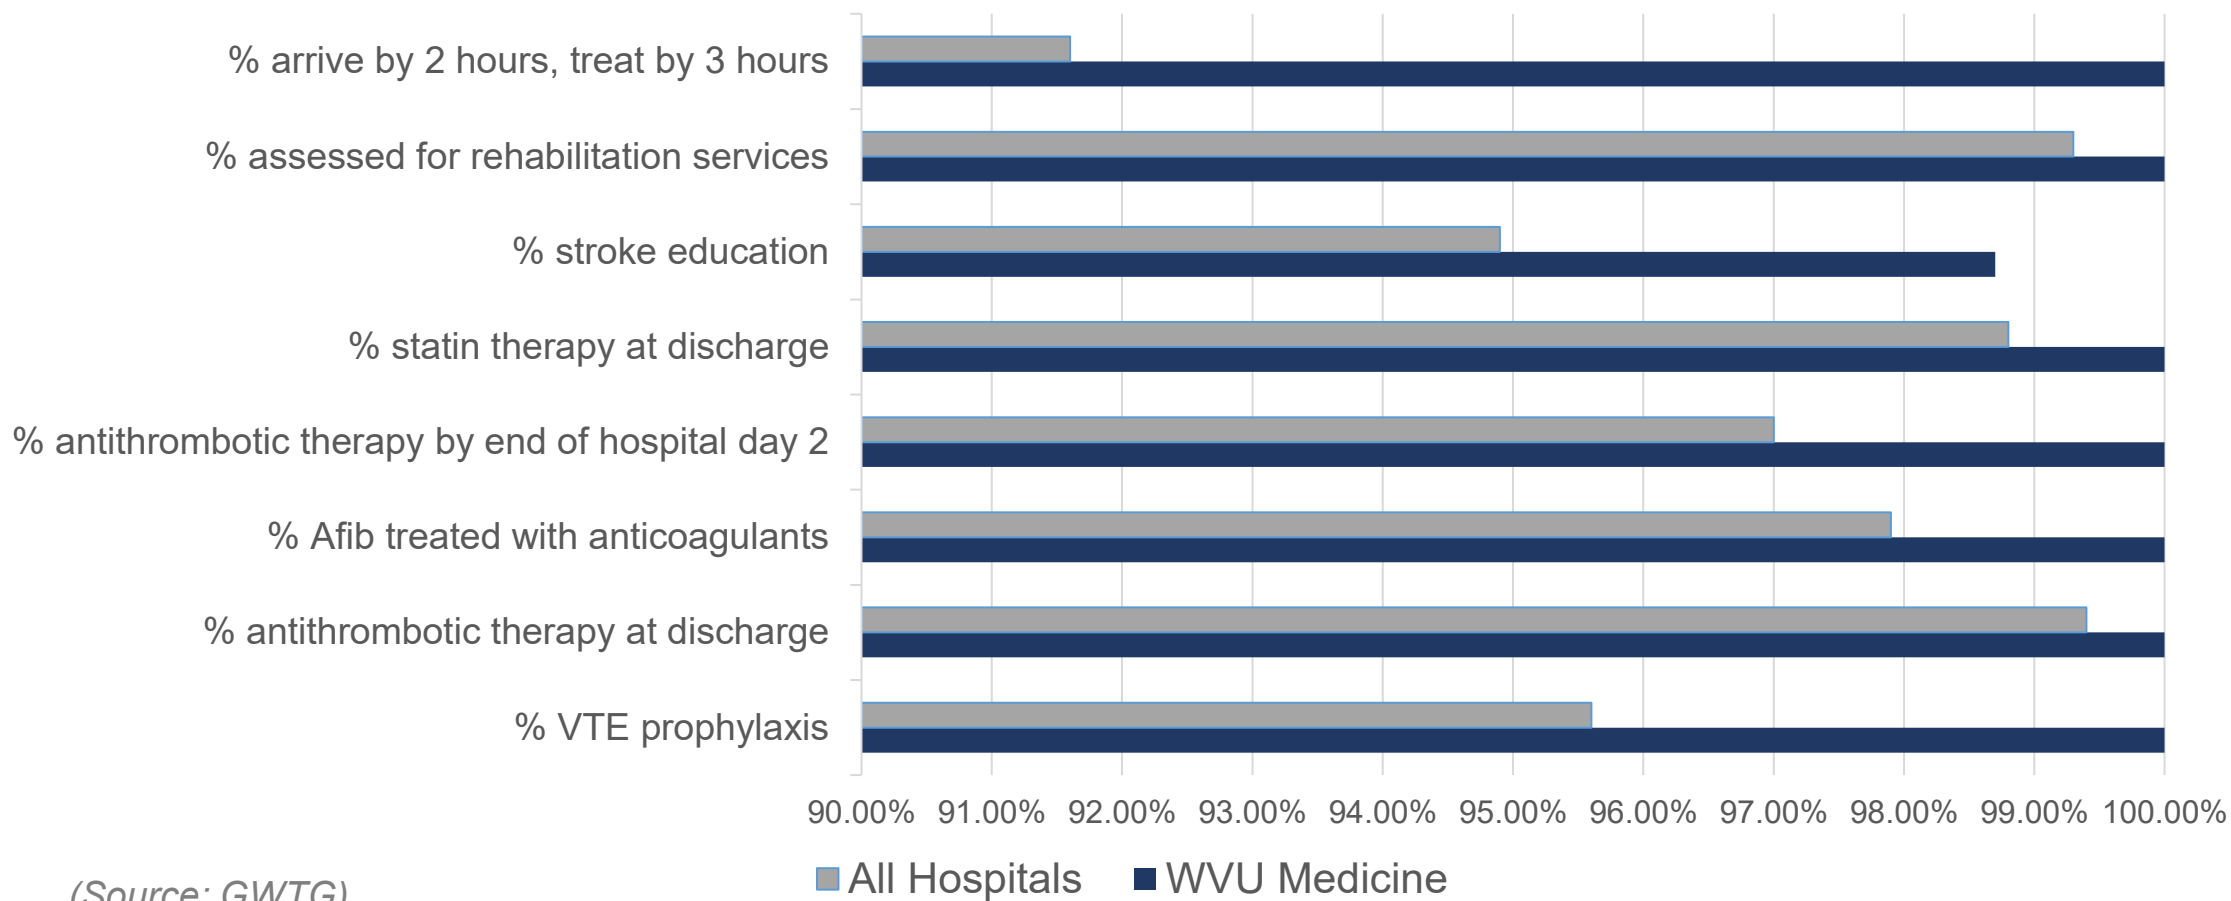

Stroke Quality Measures are the best practice for stroke care recommended by the Joint Commission and the American Heart Association/American Stroke Association based on the most up-to-date research and quality data.

Cycle of Healthcare Quality

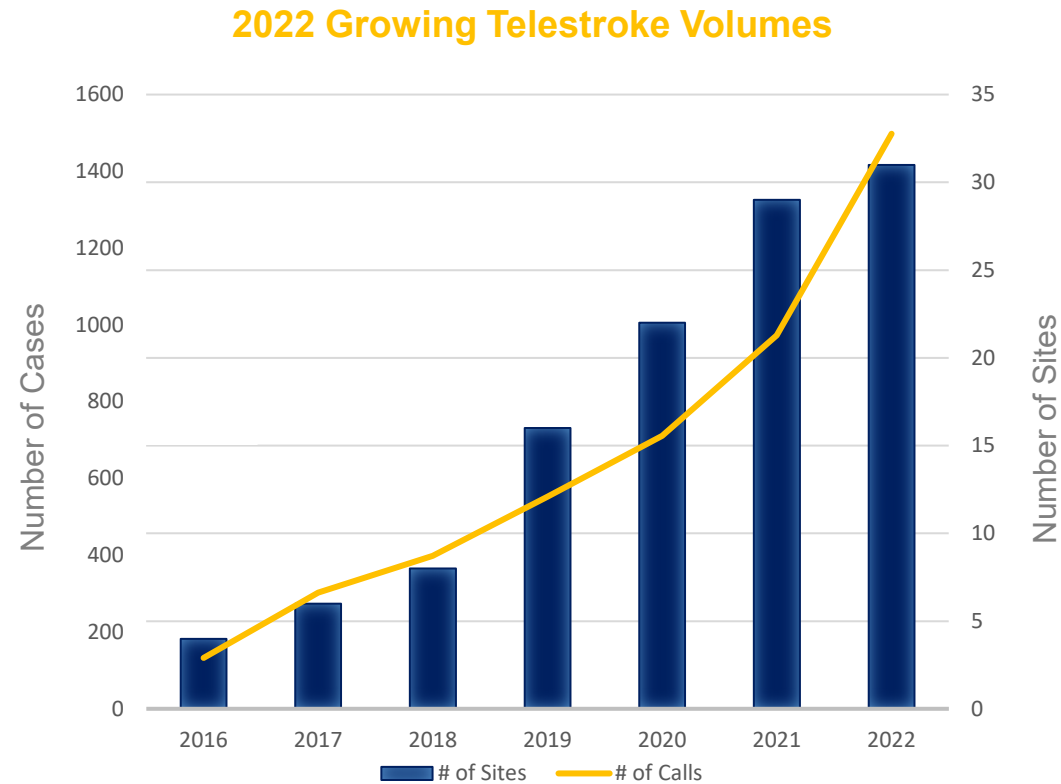

We consistently *exceed* the national average on Joint Commission Stroke Quality Measures.

Excellent Quality Measure Compliance in 2022

J. W. Ruby Memorial Hospital is *committed to serving all of West Virginia's stroke needs*. In 2022, we expanded our Telestroke coverage to help fill the gap for the shortage of stroke specialists in the state.

Telestroke works like a secure video call between doctors. An emergency physician miles away can consult with our stroke neurologists at the push of a button, 24/7. This helps to ensure that patients are getting the best possible care.
